S4-1.5

Fluorescent Nanoscale Structures for Selective Medical Diagnostics

V.S. Osipovich, K.D. Yashin, S.K. Dzik and A.A. Bykov

Belarusian State University of Informatics and Radioelectronics (BSUIR), Information Systems and Technologies for Industrial Safety, Minsk, Republic of Belarus

The development of nano-bio-information technologies for solving urgent problems of biomedical diagnostics: in particular, for imaging pathologically changed cells and tissues. Big Data technologies for this purpose is used.
